

Dear Parents,

This half term, our class will be learning the Earth's biomes and discovering how different they are during our Geography lessons. To extend the children's learning further, we are asking that the children produce a homework project based the following ideas.

They could perhaps:

- Take a cutting from a plant to try to grow a new plant. Create a report / instructions / photo diary to document the process.
- Create a 3D model / detailed artistic interpretation of one of the Earth's biomes.
- Create an in-depth fact file / presentation about one of the Earth's biomes.

But overall, enjoy independent learning in any way they choose.

Children can present the information they research in any way they wish but there should just be one outcome each which shows what they have learnt about from their research.

The aim of the home learning project is to spend a little time each week working on the project and bring the result into school on **Monday 2nd November 2026**. On **Tuesday 3rd November**, straight after school, parents are invited into the school hall, where projects from all classes will be displayed for you to see in a 'Homework Showcase'.

We are asking parents to spend time with your child sharing in the preparation and planning, talking together about what they are doing and providing encouragement and support.

We really hope you will enjoy working together and extending your child's learning at school further.

Yours sincerely,

Mr Burrows
